Core Competencies

JPG Plumbing and Mechanical Services (JPG) is a provider of commercial, industrial, and institutional HVAC, plumbing, industrial vacuum, and predictive maintenance services established in 2006. JPG has expanded its capacity and capabilities, employing over 100 team members who provide "Prompt, Professional Solutions" to some of the most sophisticated customers in the Washington DC metropolitan area. JPG is leader in providing emergency services. Emergencies are handled by an on-call manager who properly defines and vets the call. JPG mobilizes for maximum effectiveness and efficiency. JPG partners with the most responsible and responsive vendors and subcontractors. Each subcontractor is required to commit to the JPG core values and safety program. Our key vendor partners are available 24/7, 365 days a year to provide critical resources and support for resolving our customers most pressing issues.

Differentiators

JPG prides itself for offering diversified services and solutions including predictive maintenance services, which provide a "One Stop Shop" for our clients most complicated projects. The Plumbing Services Team tackles such projects as emergency water main repairs, gas piping projects, medical gas, sewage pumping station repairs, hydro-jetting and drain clearing, video pipe inspections and backflow prevention as some of the many offerings provided. The HVAC Team performs maintenance and upgrades on a full range of equipment and air side issues. The Vac Services Team has equipment that will perform a wide variety of services such as tank pumping, pit cleaning and maintenance, storm water system maintenance and cleaning, and NASSCO Certified robotic camera inspection, and MS4 inspections.

Finally, JPG is a company focused on the safety of our employees, customers, and public. Team members undergo a thorough pre-employment safety orientation and is required to obtain OSHA 30 and confined space training within 90 days of employment. Every JPG field team member participates in bi-weekly safety briefings using the MCAA and MSCA Toolbox Talks. The Safety Leadership Team consists of company leaders and technicians, our insurance company, and the Chesapeake Regional Safety Council. The team meets monthly to review safety plans and to develop new safety initiatives to keep team members free from injury.
